METROPOLITAN DISTRICT

Can the Grease!

COOKING MORE THIS SEASON?

Do your pipes a favor: **don't dump grease down the drain.** Fats, oils and grease harden in your pipes, causing clogs (and expensive) backups!

PROTECT YOUR PIPES

- **Contain grease:** Pour grease into a container (like a used aluminum can) and throw it away, not down the sink.
- **Wipe & wash:** Wipe pans before washing them. Toss the towels.
- **Toss all wipes:** Even biodegradable or “flushable” wipes should be tossed, not flushed — they clog lines.

A few small steps now can prevent a nasty interruption to your holiday celebrations. More info online at cpnmd.org/avoiding-addressing-sewer-backups.
